28 kWm 1500 rev/min 30 kWm 1800 rev/min **GENSET POWER**

High Power Density

Power output and torque per liter are superior to normal level with optimized structure strengthening.

■ Low Fuel Consumption

The excellent combustion system can reduce fuel consumption, emission and noise, meanwhile increase engine power output.

■ Easy Maintenance

All routine service items are situated on the right hand side of engine allowing easy maintenance and minimum machine downtime.

■ Durability & Reliability

Start normally at -10°C without

preheated device, start smoothly at -25°C through flame glow plug cold start aid. Maximum cooling efficiency is provided by a gear driven water pump and independent fan drive. Leak free operation is ensured by Viton crankshaft seals and sophisticated controlled swell joints. giving protection in the toughest conditions.
